

Skills

Languages: Java, Python, JavaScript

Frameworks: Node.js, React.js, Express.js, FastAPI, TensorFlow, Scikit-learn, Pandas, NumPy

Database: MySQL, MS-SQL, MongoDB

Tools/Technologies: Git, GitHub, VS Code, Postman, JWT Authentication, REST APIs

Core: Data Structures & Algorithms, OOP, Machine Learning

Soft Skills: Quick learner, Leadership, Adaptability, Problem Solving

Projects

Pehchaan – Voter ID Verification System

- Engineered backend architecture for a **MERN-based Voter Verification System**, integrating a **Machine Learning model** for identity validation using attributes such as name, DOB, Aadhaar, and address
- Developed and maintained **scalable RESTful APIs**, implemented **JWT authentication & authorization**, and enabled seamless **backend-ML service integration** for real-time verification workflows
- Optimized **MongoDB queries**, managed **data modeling and server-side logic**, and improved system performance and reliability
- Collaborated within a **cross-functional team**, contributing to **API design, system architecture, debugging, and deployment** using **Git-based version control and best coding practices**

Tech: MongoDB, Express.js, React.js, Node.js, Axios, Machine Learning

KIZASHI – AI-Based Behavioural Analytics System

- Developed a **MERN-based behavioural analytics platform** integrated with Machine Learning models to detect behavioural drift and predict **productivity risks**.
- Performed data preprocessing, feature engineering, and predictive analysis using behavioural datasets and **Behavioural Drift Index (BDI)** modelling.
- Built an interactive dashboard for **behavioural monitoring**, adaptive insights, and real-time productivity analysis.

Tech: MongoDB, Express.js, Python, FastAPI, React.js, Node.js, Scikit-learn, REST APIs

Achievements

- Awarded **Dean's List recognition** at **LPU** for being among the **Top 10%** of students based on academic performance.
- Participated in **EY Techathon 6.0**, focused on real-world problem solving and innovation.

Certificates

- Introduction to Generative Ai Studio by **Simplilearn** (February-2026)
- Introduction to RDBMS by **IBM** (August-2025)
- Crash Course on Python by **Google** (April-2024)
- HTML, CSS & JavaScript for Web Developers by **Coursera** (August-2023)

Education

Lovely Professional University	2025 - Present
Master of Computer Applications- CGPA- 8.20	Phagwara, Punjab
Lovely Professional University	2022 - 2025
Bachelor of Computer Applications- CGPA-8.05	Phagwara, Punjab
Khalsa Model Senior Secondary School	2021 - 2022
Intermediate (Science) - CGPA- 7.36	Kolkata, West Bengal
